

# Safety Data Sheet

PE-51

## Section 1. Identification

GHS product identifier PE-51

Other means of identification Not available

Product type Liquid

### Relevant identified uses of the substance or mixture and uses advised against

Not applicable

Suppliers details

Zeofill Inc.  
9241 7th avenue  
Hesperia, CA 92345  
(888) 926-4785

Product Code:

Validation Date: 2/20/2018

Print Date: 2/20/2018

In case of emergency: (888) 926-4785

## Section 2. Hazards identification

OSHA/HCS status:

While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

Classification of the substance or mixture

Not Classified

GHS label elements

Hazard Pictograms

None

Signal Word:

No signal Word

Hazard Statement:

No known significant effects or critical hazards.

Precautionary statements

Prevention

Not Applicable

Response

Not Applicable

Storage

Not Applicable

Disposal

Not Applicable

Hazards not otherwise classified

None Known

### Section 3. Composition/information on ingredients

Substance/mixture	Mixture
Other means of identification	Not Applicable
CAS number/other identifiers	
CAS number	Not Applicable
Product code	

Ingredient name	CAS number	%
Water	7732-18-5	5-80
Mutant Bacteria Strains	NA	1-10
Nonylphenol Ethoxylate	9016-45-9	1-10

Any concentration shown as a range is to protect confidentiality or is due to batch variation

**There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.**

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

Eye contact	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur
Ingestion	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur

#### Indication of immediate medical attention and special treatment needed if necessary

Notes to physician No specific treatment. Treat systematically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

#### Most important symptoms/effects, acute and delayed

##### Potential acute health effects

Eye contact	No known significant effects or critical hazards.
Inhalation	No known significant effects or critical hazards
Skin contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards

#### Over-exposure signs/symptoms

Eye contact No specific data

## Section 4. First aid measures

Inhalation	No specific data.
Skin contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards
<b><u>Indication of immediate medical attention and special treatment needed, if necessary</u></b>	
Notes to physician	In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours
Specific Treatments	No specific treatment
Protection of first aiders	No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

### Extinguishing media

Suitable extinguishing media	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	None known
Specific hazards arising from the chemical	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	Decomposition products may include the following materials: Carbon dioxide, carbon monoxide, nitrogen oxides
Special protective action for fire fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Do not breath vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment
For emergency responders	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel"
Environmental precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
<u>Methods and materials for containment and cleaning up</u>	
Small spill	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water soluble. Alternatively, or if water insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal company.
Large spill	Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbant material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

### Precautions for safe handling

#### Protective measures

Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Keep away from acids. Empty containers retain product residue and can be hazardous. Do not reuse container

#### Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see Section 10) and food and drink. Separate from acids. Keep container tightly closed and sealed until ready for use. Containers that have been open must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## Section 8. Exposure controls/personal protection

### Control parameters

### Occupational exposure limits

None

#### Appropriate engineering controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

#### Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Section 8. Exposure controls/personal protection

### Individual protection measures

#### Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the work period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead. Recommended: splash goggles

#### Skin protection

##### Hand Protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. > 8 hours (breakthrough time); butyl rubber

#### Body protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Respiratory protection

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

#### Personal protective equipment (Pictograms)

## Section 9. Physical and chemical properties

### Appearance

Physical state	Liquid
Color	Green
Odor	Fresh Cut Grass
Odor Threshold	Not available
pH	7-9.5
Melting point	Not available
Boiling point	Not available
Flash point	Closed cup:>150 degrees C. (>302F) Product does not sustain combustion
Evaporation rate	Not available
Flammability (solid, gas)	Not available
Lower and upper explosive (flammable) limits	Not available
Vapor pressure	Not available
Vapor density	Not available
Relative density	1
Solubility	Easily soluble in the following materials: cold water and hot water
Partition coefficient: n-octane/water	Not available
Auto-ignition temperature	Not available
Decomposition temperature	Not available
Viscosity	Not available

## Section 10. Stability and reactivity

Reactivity	No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	This product is stable
Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	No specific data
Incompatible materials	Reactive or incompatible with the following materials: acids
Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Nonylphenol Ethoxylate	LD50 Oral	Rat	1378 mg/kg	---
	LD50 Dermal	Rabbit	2 g/kg	---

#### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
-------------------------	--------	---------	-------	----------	-------------

## Section 11. Toxicological information

### Sensitization

Not available

### Mutagenicity

Not available

### Carcinogenicity

Not available

### Classification

### Reproductive toxicity

Not available

### Tertogenicity

Not available

### Specific target organ toxicity (single exposure)

Not available

### Specific target organ toxicity (repeated exposure)

Not available

### Aspiration hazard

Not available

Information on the likely routes of exposure      Routes of entry anticipated: Oral, Dermal, Inhalation

### Potential acute health effects

Eye contact      No known significant effects or critical hazards

Inhalation      No known significant effects or critical hazards

Skin contact      No known significant effects or critical hazards

Ingestion      No known significant effects or critical hazards

### Symptoms related to the physical, chemical and toxicological characteristics

Eye contact      Not available.

Inhalation      Not available.

Skin contact      Not available.

Ingestion      Not available.

### Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure

Potential immediate effects      Not available.

Potential delayed effects      Not available.

#### Long term exposure

Potential immediate effects      Not available.

Potential delayed effects      Not available.

Potential chronic health effects      Not available.

General      No known significant effects or critical hazards

Carcinogenicity      No known significant effects or critical hazards

Mutagenicity      No known significant effects or critical hazards

Teratogenicity      No known significant effects or critical hazards

Developmental effects      No known significant effects or critical hazards

Fertility effects      No known significant effects or critical hazards

### Numerical measures of toxicity

#### Acute toxicity estimates

Route	ATE value
Oral	2924.1 mg/kg

## Section 12. Ecological information

### Toxicity

None

### Persistence and degradability

Not available

### Bioaccumulative potential

Product/ingredient name	LogP	BCF	Potential

### Mobility in soil

Soil/water partition coefficient (Koc) Not available

Other adverse effects No known significant effects or critical hazards

## Section 13. Disposal considerations

### Disposal methods

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers

## Section 14. Transportation information

	<u>DOT Classification</u>
<u>UN number</u>	Not regulated
<u>UN proper shipping name</u>	---
<u>Transport hazard class(es)</u>	---
<u>Packing group</u>	---
<u>Environmental hazards</u>	no
<u>Additional information</u>	---

### Special precautions for user

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**Section 15. Regulatory information**

U.S. Federal regulations Not listed  
 Clean Air Act Section 112 (b) Not listed  
 Hazardous Air Pollutants (HAPs)  
 Clean Air Act Section 602 Class I Substances Not listed  
 Clean Air Act Section 602 Class II Substances Not listed  
 DEA List I Chemicals (Precursor Chemicals) Not listed  
 DEA List II Chemicals (Precursor Chemicals) Not listed  
SARA 302/304  
 Composition/information on ingredients No products found  
 SARA 304 RQ Not applicable  
SARA 311/312  
 Classification No products found
